

PowerCon

Engineering Commissioning and Operations Support for Critical Building Systems

Trusted nationwide for over 30 years

PowerCon has supported tens of millions of square feet of commercial and mission-critical facilities through engineering design, commissioning and operational consulting. Our design experience ranges from replacement of electric utility service switchboards serving skyscrapers to phased chiller plant upgrades supporting data centers completed without operational downtime. PowerCon is licensed to provide engineering services in over half of the United States, supporting clients with national building portfolios. Our team has also delivered electrical power studies and Fire Life Safety consulting across several million square feet of space.

KEY DIFFERENTIATORS

- Integrated expertise across engineering design, commissioning, and facility operations
- Specialists in critical mechanical and electrical infrastructure for complex facilities
- Practical engineering solutions from experienced field engineers

CORE SERVICES

- MEP Engineering Design – from facility condition assessments to tenant fitouts and full building infrastructure modernization
- Commissioning – systematically validate design intent, reliability, and readiness for operations
- Operations Support – engineering oversight to improve reliability, maintenance, and system performance

SPECIALIZED EXPERTISE

- Short Circuit, Coordination, and Arc Flash studies supporting safe electrical system operation
- Fire Life Safety Consulting and Commissioning for large commercial facilities
- NYC Local Law compliance consulting for building portfolios supporting LL87, LL88, and LL97
